

STAND

Reinforced, elegant, and motorized wall mount for interactive screen

Ref.: ST-SUP-MUR-ELE-002

This electric wall mount, placed on the floor with an ultra-thin structure, offers elegance and robustness:

- Perfectly adapts to screens from 55 to 98 inches.
- Equipped with a socket with its 5m multi-outlet cable, its ingenious design and neat aesthetics allow you to hide the cables in its central column and easily connect your interactive screen while concealing the wires.
- Its adjustment allows for a range of 60 cm.
- The height adjustment is done simply with 2 buttons for smooth and secure raising or lowering.
- It adapts to all types of walls thanks to the good distribution of the load between the wall where it is fixed and the floor where it is placed, offering increased resistance and stability.
